

SIMPLIFIED SCREENING STARTS HERE

Oral Fluid drug tester

TRUSTED ALWAYS

- ✓ Compliant and Verified to AS/NZS 4760:2019
- ✓ Improved accuracy and reliability
- ✓ Simple, clear, visual indication
- ✓ Fast collection process
- ✓ Results in 2 minutes

RAPID DETECTION

Oral Detect is a rapid, single use oral fluid drugs of abuse detection device. Providing fast results, with negative results as early as 2 minutes.

MULTIPLE DRUG GROUPS

Oral Detect is configured with 7 drugs including Amphetamines, Benzodiazepines, Cocaine, Methamphetamines, Opiates, Oxycodone, and THC, covering all drug detection requirements to comply with current standards.

COMPLIANT TO STANDARDS

Oral Detect is compliant and independently verified to meet AS/NZS 4760:2019 Standards for detection of drugs in oral fluid. Providing confidence in performance and reliability of test results.

EASY INTERPRETATION

Simple, clear, visual indication for the presence/absence of illicit substances. Improves accuracy and result confirmations.

FAST COLLECTION PROCESS

Fast collection process reduces wait times for results.

VOLUME INDICATOR

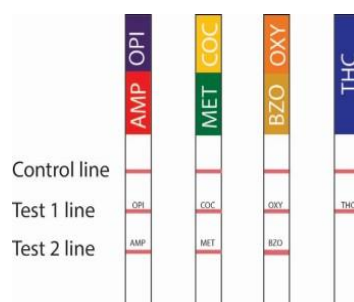

The sample volume indicator streamlines the test process, reducing failed analysis and repeat testing. Saving time, money and resources.

ORAL TESTING

Provides a less invasive and more convenient sampling collection. Immediate and recent drug use detection, providing a more reliable indicator of impairment.

Quality
ISO 9001
